

PRODUCT NAME

OnDry – NATURAL BEDDING PELLETS FOR CATTLE AND PIGS

○ 3,5 mm ○ 4,5 mm ○ 6 mm ○ 8 mm

INTENDED USE

OnDry pellets – 100 % sustainable litter substrate, developed for safe and healthy rearing of farm animals.

COMPOSITION

Produced from carefully selected wheat straw.

PRODUCT OVERVIEW

- pellets made from a selected blend of cereal straw, without chemical additives
- available as whole pellets: 6 mm or 8 mm and as crushed fractions: 3.5 mm and 4.5 mm
- absorb moisture and unpleasant odours
- free from dust and allergens
- free from microorganisms, fungi and parasites
- hygienic
- soft and clean

BENEFITS

- intended for cattle and pig farms
- reduces the number of mechanical injuries to skin and udders
- prevents friction burns
- isolates the ground
- provides an anti-slip surface
- facilitates maintaining high levels of hygiene
- easy to spread – saves time
- no costs of straw storage – savings
- easy storage
- biodegradable – ideal for composting
- natural, eco-friendly product
- available 365 days a year

TECHNICAL PARAMETERS

Diameter:	
Full fraction	6 mm, 8 mm
Crushed fractions	3,5 mm; 4,5 mm
Average consumption (kg/m² per 1 cm of the layer):	
Full fraction	ca. 6-8 kg/m ²
Crushed fraction (depending on the fraction and farming technology)	1-4,5 kg/m ²
Sieved, dust-free	
Absorbing capacity	from 520 % to 680 %

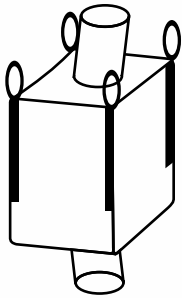

MICROBIOLOGY

Salmonella spp bacilli	absent
Toxin-forming fungi	absent
Total microbial count	2,0 x 10 ⁵ ≤ 4 CFU/g
Moulds and yeasts	2,0 x 10 ⁵ ≤ 2 CFU/g
Clostridium perfringens	< 1 x 10 ⁵ CFU/g
E.coli	< 1 x 10 ⁵ CFU/g

PACKAGING

BIG BAG packaging
weight 1000 kg

On request, pellets in BIG BAGs can be packed on a 100 cm x 120 cm pallet

Bulk transport
up to 24 tons

Walking floor

Tarpaulin

Tipper

TRANSPORT

The pellets are transported in covered vehicles. The load is stacked and secured in accordance with the transport regulations for road transport. Transport of less than a truck load is possible starting from 1 pallet. Full-vehicle deliveries by semi-trailers, such as tarpaulin, tipper or moving floor – 24 tonnes.

STORAGE

We recommend storing the pellets in BIGBAG in premises meeting the following conditions:

- roofed building with ventilation,
- in a dry place and not directly exposed to the elements,
- pellet sacks should be insulated from the ground by being stored on pallets,

Storing pellets in a BIGBag and in bulk under conditions other than those described above may result in damage to the pellets, for which Biomasa Partner Group is not responsible.
